What is Oracle OpenWorld?

Oracle OpenWorld is the leading global educational and networking event held each year for Oracle technologists, customers, and partners. It’s also the most cost-effective and efficient way to learn how Oracle is simplifying IT by engineering hardware and software to work together in the cloud and in the data center–from servers and storage, to database and middleware, through applications. Thousands of sessions and hundreds of demos help users get better results with their current technology–and help them plan for the future. Oracle OpenWorld takes place September 30–October 4, 2012 in San Francisco.
