Saluting Innovation @ RealWear

by Katherine Valentino and Kelsey Harmon

Saluting Innovation at RealWear for making industrial IoT data visualization simple. As the world’s first industrial head mounted Android tablet, RealWear has the potential to revolutionize industrial manufacturing.

RealWear is a straightforward augmented reality device that provides relevant information overlaid onto the camera feed. Hands free and with voice recognition, RealWear is easy to use without getting in the way. It can easily connect to IoT platforms like ThingWorx, and meets all safety requirements for heavy industrial environments.

RealWear gives users access to assembly guides and work instructions, providing users with the confidence and ability to

We salute RealWear for unlocking the potential of augmented reality in Industry 4.0 with a user device that won't get in the way.
